Portfolio: <https://www.muthukumar.win>

Possess a rich background in software development, emphasizing the creation of cutting-edge solutions across various product-focused industries. Aiming to leverage advanced technologies to enhance user experiences in product-focused industries, particularly within the IT sector.

PROFILE SUMMARY

- ❖ Technology **Leader and Solution Architect** with nearly **15 years** of experience owning **end-to-end architecture** and delivery of large-scale, product-centric platforms, building scalable, secure, and high-performance enterprise systems from concept to production.
- ❖ Strategic owner of end-to-end solution **architecture and delivery**, driving complex web and mobile ecosystems encompassing portals, mobile applications, kiosks, and third-party integrations, while ensuring **scalability, security, and long-term maintainability**.
- ❖ Expert in modern JavaScript ecosystems (**React.js, Node.js, Next.js, React Native**) with a proven skill to design **modular, Microservices-based architectures** that reduce deployment cycles and improve system responsiveness.
- ❖ Proven engineering **leader and mentor**, skilled at building high-performing teams through strong governance, **code quality standards**, sprint leadership, and continuous improvement practices aligned with Agile and DevOps principles.
- ❖ Showcased record of driving measurable business impact, including up to 90% performance improvements, 80% user engagement growth, and 95% operational efficiency gains through thoughtful system design, optimization, and feature innovation.
- ❖ Deep expertise in enterprise integrations and **API strategy**, enabling seamless interoperability with WMS, voice bots, analytics platforms, and operational monitoring systems to support real-time, data-driven decision-making.
- ❖ Demonstrated expertise in delivering End-to-End (**E2E**) **MERN stack** solutions (**MongoDB, Express.js, React.js, Node.js**) by architecting and building applications from scratch — covering requirement analysis, system design, database modeling, API development, frontend implementation, cloud deployment, and production support — ensuring scalable, secure, and high-performing product ecosystems.

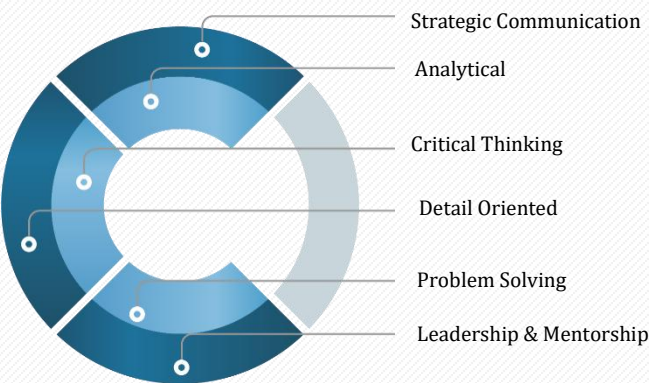

CORE COMPETENCIES

- Full Stack Architecture & Engineering
- Enterprise Application Design & Scalability
- React.js / Node.js / Next.js Ecosystem Leadership
- Cloud-Native Development
- Agile Delivery & Engineering Governance
- Performance Engineering & Optimization
- API Strategy, Integration & Orchestration
- System Reliability, Availability & Monitoring
- DevOps, CI/CD & Automation Pipelines

SOFT SKILLS

EDUCATION

M.Sc.|2011
Computer Science & IT—Arulmigu Palani Andavar College

B.Sc.|2008
Information Technology— Arumugam Pillai Seethai Ammal College

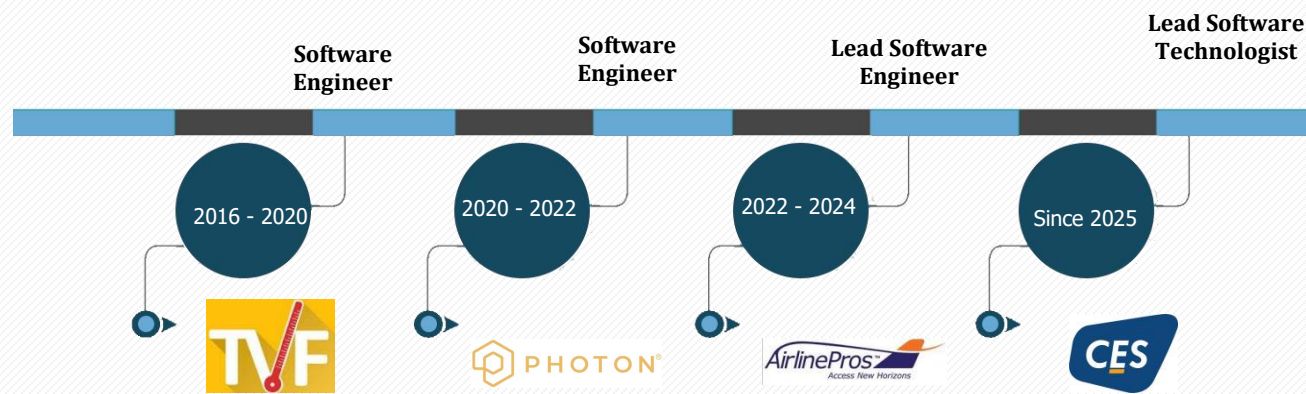

IT SKILLS

- ❖ **React.js | Node.js | Next.js | React Native | Python | AI Prompt engineering | MongoDB | HTML5 | CSS3 | JavaScript(ES6) | RESTful APIs | Git | Cloud Architect (AWS, Azure) | GCP | AI & LLM Engineering**

TIMELINE (Recent Four)

Recent projects

- ❖ **TechYenthra LegalDesk** (Founder & Full-Stack Architect) Ongoing
link: <https://legal.techyenthra.com/>
- ❖ **CodeSense** – AI Code Review Platform (Founder & Full-Stack Architect)
Link : <https://codesense.online>
- ❖ **Jothisham** – AI Astrology Platform (Founder & Full-Stack Architect)
Web: <https://www.jothisham.com>
Mobile: <https://play.google.com/store/apps/details?id=com.jothisham>
- ❖ **Flying Carpet**
web: <https://www.flyingcarpet.travel>
Mobile: <https://play.google.com/store/apps/details?id=com.airlinePros.flyingcarpet>

NOTABLE ACCOMPLISHMENTS ACROSS CAREER

- ❖ Architected and delivered scalable full-stack solutions for **web, mobile**, and kiosk platforms, driving operational efficiency and **reducing process time**.
- ❖ Led cross-functional engineering teams, mentoring developers, establishing coding standards, and fostering a culture of technical excellence and accountability.
- ❖ Drove modernization of legacy systems into **Microservices-based** architectures, improving system scalability, performance, and deployment speed.
- ❖ Implemented performance optimization strategies, reducing application load times, boosting user engagement and satisfaction.

WORK EXPERIENCE

CES IT PVT LTD, Chennai | Lead Software Technologist/Architect | April 2025 – January 2026

- ❖ Delivered **End-to-End (E2E) MERN stack** solutions (**MongoDB, Express.js, React.js, React Native, Node.js, Python**) by **architecting** and building enterprise logistics platforms from scratch
- ❖ Managing the end-to-end architecture, engineering, and evolution of enterprise-grade platforms including the CSO Portal, Driver Mobile Application, and Kiosk Systems for **Niagara Bottling, LLC**, enabling seamless **warehouse and yard operations** at scale.
- ❖ Leading **solution design** and hands-on development across full-stack systems, ensuring high availability, scalability, and performance while enforcing clean architecture, coding standards, and long-term maintainability.
- ❖ Driving **Agile delivery** and engineering governance, overseeing sprint planning, backlog prioritization, code reviews, and release cycles to ensure predictable, high-quality outcomes aligned with business objectives.
- ❖ Architecting and implementing mission-critical logistics workflows, supporting **driver check-in/check-out**, yard load and unload operations (Pre-Load, Live Load, Drop Empty, Transfer Shipments), and real-time operational visibility for CSO teams.
- ❖ Enabling self-service and operational efficiency through the design and deployment of kiosk-based workflows, reducing manual intervention and improving turnaround times across **warehouse** operations.
- ❖ Integrating complex third-party ecosystems, including Niagara Eye, Voice Bot platforms, and Manhattan WMS, ensuring reliable, secure, and performant system interoperability.
- ❖ **Mentoring and guiding engineering teams**, fostering a culture of technical excellence, ownership, and continuous improvement while scaling engineering practices to meet evolving product and operational demands.

Airline Pros, Kochi | Lead Software Engineer/Architect | February 2022 – December 2024

- ❖ Engineered and deployed full-scale **E2E MERN stack + React Native** applications from the ground up, owning complete lifecycle execution from **architectural** blueprint and database design to API development, responsive UI implementation, CI/CD pipelines, and post-go-live support.
- ❖ Led the design and delivery of **enterprise-grade applications**, aligning technical architecture with strategic business objectives while ensuring scalability, security, and long-term sustainability.
- ❖ Owned the complete **Software Development Life Cycle (SDLC)**, spanning requirements analysis, **solution design, development, testing, deployment, and post-production support**, consistently delivering high-quality, reliable systems.
- ❖ Drove the adoption of modern architectural paradigms, including **Microservices-based** design, improving system scalability, fault tolerance, and deployment efficiency.
- ❖ Provided **strong technical leadership** and mentorship, establishing coding standards, best practices, and review frameworks that elevated code quality, team productivity, and engineering maturity.
- ❖ Collaborated closely with **cross-functional stakeholders**, including **product, operations, and business teams**, to define clear objectives, manage expectations, and ensure on-time, high-impact delivery.
- ❖ Architected and integrated third-party APIs and services, optimizing application performance, enhancing system interoperability, and delivering improved user experience across platforms.
- ❖ Acted as a technical decision-maker and problem solver, resolving **complex engineering challenges** while balancing performance, maintainability, and business priorities.

Photon Infotech, Chennai | Technical Lead/Architect| July 2020 – February 2022

- ❖ Contributed to the development of scalable **MERN stack**-based web applications built from scratch, implementing modular frontend components, **RESTful** backend services, and optimized MongoDB data models to deliver high-performance, production-ready solutions.
- ❖ Redesigned and modernized large-scale **eCommerce** platforms, delivering significant improvements in user interface, usability, and customer engagement across web applications.
- ❖ Engineered **scalable**, high-performance web solutions using modern **JavaScript frameworks**, ensuring **responsive design, cross-browser compatibility, and optimized load times**.
- ❖ Applied rigorous **testing, debugging, and quality assurance** practices, proactively identifying and resolving defects to maintain high reliability and production stability.
- ❖ Played a key role in **cloud migration initiatives**, supporting the transition to **cloud-based infrastructure** to improve application availability, scalability, and cost efficiency.

- ❖ Partnered closely with business stakeholders and product teams, translating functional requirements into technical solutions aligned with commercial goals and delivery timelines.
- ❖ Contributed to continuous improvement initiatives, enhancing **development workflows, code quality, and deployment readiness within Agile delivery** environments.

The Viral Fever, Chennai | Senior Software Engineer/Architect | December 2016– July 2020

- ❖ Led architecture and development of scalable **OTT** (Over-the-Top) **streaming platform** supporting high user traffic
- ❖ Built and optimized frontend applications using **React.js**, ensuring seamless video playback and user experience
- ❖ Designed and developed backend services using **Node.js and Express.js** for content delivery, user management, and analytics
- ❖ Implemented **microservices** architecture to support scalable video streaming and content distribution
- ❖ Integrated video streaming technologies (**HLS/DASH**) and CDN services for efficient media delivery
- ❖ Improved performance by optimizing APIs, implementing caching strategies, and reducing load times
- ❖ Developed secure authentication and subscription-based access systems (**JWT**, role-based access)
- ❖ Collaborated with product and content teams to deliver new features like recommendations and user engagement modules
- ❖ Led code reviews, mentored team members, and established best practices for scalable application development
- ❖ Managed **CI/CD** pipelines and deployment processes for frequent and reliable releases

L&T Technology Services, Mysore | Senior Software Engineer | May 2015– December 2016

- ❖ Developed enterprise-grade web applications using **JavaScript, React, Node.js**
- ❖ Designed **RESTful APIs** and ensured high performance and responsiveness
- ❖ Worked on responsive UI development with **HTML5, CSS3**, and modern JS frameworks
- ❖ Collaborated with stakeholders to gather requirements and translate them into technical solutions
- ❖ Optimized application performance and fixed production issues
- ❖ Participated in Agile ceremonies including sprint planning and retrospectives
- ❖ Ensured code quality through unit testing and peer reviews

DispatchTrack, Mysore | Web Developer | May 2013– May 2015

- ❖ Developed and maintained logistics and delivery tracking web applications
- ❖ Built dynamic **UI** components using **JavaScript, jQuery**, and frontend frameworks
- ❖ Integrated backend **APIs** and improved real-time data updates
- ❖ Worked on performance optimization and bug fixing for production systems
- ❖ Collaborated with backend teams to enhance system functionality
- ❖ Ensured cross-browser compatibility and responsive design

Amber IT Minds, Bangalore | Web Developer | April 2011– May 2013

- ❖ Developed web applications and websites using HTML, CSS, JavaScript, and PHP
- ❖ Created responsive layouts and user-friendly interfaces
- ❖ Fixed bugs, improved **UI/UX**, and ensured application stability

 PERSONAL DETAILS

Date of Birth: 30th July 1988 | **Languages Known:** English, Tamil, Kannada | **Address:**11,ESIC Naagar, Thattankumam road, Narasingam, Madurai, 625107
